

Laek Limited is a software development consultancy that specialises in providing remote, outsourced IT project development services.

We concentrate on providing quality, stable solutions that compliment your existing capabilities, and assist you in meeting your IT development needs.

Remote Development

Laek Limited offers remote development facilities, and our development methodology supports this: every step of the project is documented, agreed upon and where applicable, modeled, before any development begins.

We will deliver what the client wants, but the client has to know what they want! We have seen many projects go over-time and over-budget simply because the deliverables were not clearly mapped at the outset. We make sure the deliverables are clearly defined.

Our clients also have access to our web portal, where they can view Gantt charts, time lines, developer diaries, time sheets and budgets for the relevant project. This allows for instant updates at any stage of the project.

Extensive Knowledge-Base:

With over 20 years in the industry, we are able to offer solutions based on an impressive array of languages and technologies -

Languages supported:

- .Net – VB.Net; C#.Net; C.Net; ASP.Net.
- Win32 platform – Assembler; VisualBasic; C; C++; VBA.
- Internet/intranet – VBScript; JavaScript; HTML; PHP; ASP; XML; Perl.
- DataBase – SQL; TSQL.
- Other – ABAP/SAP.

Technologies supported:

- OS level – OS; DLL; COM; DCOM; HTTP; FTP; SMTP.
- MS-Office – Excel; Access; Word; Office Integration.
- Database – MySQL; MS-SQL; Data Import/Export; Data Processing.
- Internet - Website Design and Maintenance; Intranet Design and Maintenance; Image Processing; Sound Processing.
- Applications – Business; System; Client-Server; 3-Tier; n-Tier applications.
- Installers – Installshield; Wise; NSIS.
- Automation – Task; System; Work flow; Detection/Response Automation.
- Legacy – Integration; Conversion; Extension of Legacy Applications.

Complete Software Development Life-Cycle:

Laek Limited is the developer of a commercial software solution aimed at Managed Services Providers, called Remote Control©.

The development of Remote Control© has given us an intrinsic understanding of the complete software development life-cycle. This knowledge is carried over to our clients.

The stages of the software development life-cycle include:

- user requirement documentation
- functional specification documentation
- technical specification documentation
- development
- testing
- installation and implementation
- on line and printed user-manuals
- user training and support

Source Code Retention:

One of the recent trends we have noticed is contractors not providing the complete source code in a timely manner, if at all.

We deliver complete source code, along with extensive documentation at the end of the project.

Some of our clients past and present include:

- 2day.com
- Anuvacorp
- Beca Carter Valuations
- Farmers
- Geac
- McPond
- More4apps
- NZoom
- Orix
- Softwareimages
- Virtualspectator
- Whitcoulls

If you would like more information, would like to arrange a meeting or just want to discuss a project, please do not hesitate to contact us.

Laek Limited – the smart choice.
